

ACCESSORIES

Rubber Fab offers the following accessories and hose enhancements to meet specific needs during certain operations:

RF-SG
RF-FS
RF-SL
RF-AR
RF-PO

RF-SG – Spring Guard

The Spring Guard is used to prolong the life of hose lines exposed to rugged operating conditions, such as severe flexing. Spring Guard prevents kinking and protects against abrasion.

RF-FS – Silicone Fire Sleeve

The Silicone Fire Sleeve is made of fiberglass and is coated and bonded with silicone rubber. This coating provides temperature flame resistance, protecting the integrity of the hose during extreme temperature conditions, and serves as a thermal insulator.

RF-SL – Silicone Cover

The Clear Silicone Cover provides protection during extreme environmental exposure. Provides ease of cleanability when over a braided stainless steel hose. Also serves as a “to the touch” thermal insulator.

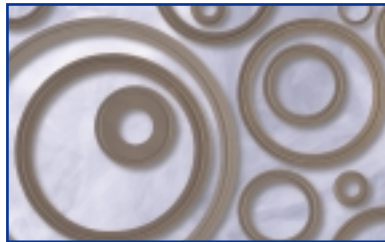

RF-AR – Armor Casing

The Armor Casing feature is a highly flexible, heavy duty metal casing which protects the hose against rough handling and over bending. Armor can be applied over the entire length or on short sections at the connection. Armor cuffs of 12-18" can be applied to each end of the hose to prevent kinking and over stress.

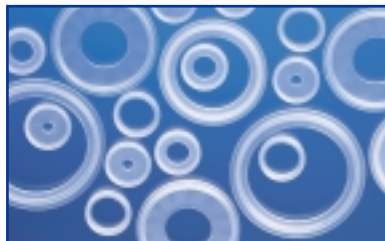

RF-PO – Heat Shrink Tubing

Polyolefin clear or white Heat Shrink Tubing is extremely beneficial in applications where cleanliness is essential, such as food and pharmaceutical processes. It provides easy cleaning of the outer hose surface.

GASKETS

Rubber Fab offers a full line of standard and custom gaskets for almost every application.

TORQUE-RITE® & PERFECT SURFACE GASKETS

Control compression and expansion while maintaining constant inch/pounds force assuring a Perfect Surface I.D.

ACCESSORIES

Features

- Spring guard
- Fire sleeve
- Silicone cover
- Armor and armor cuffs
- Heat shrink tubing
- Other hose covers are also available, consult factory with specific needs

Also Available

- Rubber Fab offers a full line of high purity gaskets from mini to 12" in:
 - Platinum Cured Silicone
 - Type I and Type II
 - Orifice Plates
 - Perfect Surface Gaskets
 - Smart Gaskets
 - Thermocouple Gaskets
 - Spore Traps
 - Screen Gaskets
